

- UPLAND MEADOW - Mesic conditions, moderate height, high diversity, regionally appropriate.
- UPLAND MEADOW TEST PLOT AREAS (areas with vegetation already being controlled).
- MOWABLE MEADOW - A clumping rush and sedge mix that can tolerate occasional mowing. Will be short to prevent debris collection and allow stormwater to move towards drains. Seed only.
- WET MEADOW - Hydric conditions, seasonally flooded.
- TALL DRIFT - an overlay of tall and showy species.
- BOULDER / ROCK SWALES
